

SUCTION CUP AND GRIPPER LIFTERS

Manual suction cups glass lifters allow easy and secure transportation of glass sheets. We offer several types of suction cups lifters, with varying weight lifting power. You can choose from single or multiple suction cup pads with varying vacuum mechanisms. Below are models ideal for transporting glass, marble and plastic.

NEW!

We produce suction cups with a special rubber that allows secure lifting and moving of materials even if they are not perfectly smooth.

Green Line

	Part No.	Carries	Cup Diameter	Description
	VSC	40 kg	120 mm	Single 120 mm diameter suction pad with an aluminum handle and body with a plastic lever. Lever vacuum mechanism. Suitable for laying tiles and placing of small glass sheets.
	VTC1038	60 kg	120 mm	Dual 120 mm diameter suction pads for moving small and medium sheets of glass, marble or laminated plastic. Designed for manageability, ergonomics and esthetics with the suction pad built to obtain maximum adhesion and durability.
	VTC1039	100 kg	120 mm	Triple 120 mm diameter suction pad lifter used for moving medium and large sheets of glass, marble and laminated plastic. Designed for manageability, ergonomics and esthetics with the suction pad built to obtain maximum adhesion and durability.

Red Line

	Part No.	Glass Thickness	Suction	Vacuum Pressure	Lifting Capacity	Description
	VCUP150	4 mm	Basso	20 hg	100 kg vertical	Single 180 mm diameter pad with centered knob for adjusting the vacuum strength with a gauge indicator of low, medium and high suction.
				30 hg		
		4-6 mm	Medium	30 hg	130 kg vertical	
				50 hg		
		6-8 mm	Alto	50 hg	150 kg vertical	
				60 hg		
	VCUP200	4 mm	Basso	20 hg	100 kg vertical	Single 200 mm diameter pad with centered knob for adjusting the vacuum strength with a gauge indicator of low, medium and high suction.
				30 hg		
		4-6 mm	Medium	30 hg	130 kg vertical	
				50 hg		
		6-8 mm	Alto	50 hg	160 kg vertical	
				60 hg		
		8-10 mm		60 hg	190 kg vertical	

	Part No.	Lifting Capacity	Description
	VCUP400	300 kg vertical	Dual pad with fixed spacer bar and gauge.

All models are certified and produced with the best rubber compounds with a sturdy aluminum body. Available spare parts include the rubber pads, pins and levers. Ask us about customized plastic parts.

Gripper

	Part No.	Description
	PITG	<p>Gripper Sheet Carrier. Formed by two parallel jaws between them. The aluminum body has contact planes which are covered with rubber. Perfect for lifting sheets of glass where the bigger the load, the better the clamping force.</p> <p>Lifts 80 kg per pair</p>
